RE: Please Support Roberts/Horn Amendments to the Business Processing Re-engineering Plan on Feb. 28th.

Dear Supervisor:

I am a constituent in your district, and I proudly make a living in the [[Position]] area of the building industry. I understand you will be considering important changes to the County's Department of Planning and Land Use that can affect construction times and the cost of new homes.

Supervisors Bill Horn and Ron Roberts have proposed changes that are a sound compromise between the needs of the regulated community and the county that must responsibly guide land use in the unincorporated areas.

Reducing processing times by 35% to 50% will help housing affordability.

This issue is very important to those of us employed in the building industry, and I am asking for your help. Your vote is critical to the plan's success.

Sincerely,

[[Firstname]] [[Lastname]]
